

## Government Overview

USA Mobility recognizes you need to maintain reliable, constant communications with all agencies, divisions and departments. Your communication system is of critical importance when challenged with taking care of your citizens. You need cost-effective, advanced technology to connect with your communities, streamline administration and reduced costs.

USA Mobility's advanced communications and mobile data applications are designed to keep your teams connected to the people and the information they need to do their jobs. We offer unique solutions to unify communications for all departments, critical teams or emergency response teams to help you effectively manage your municipality or government office.

- Messages, updates and notices can be sent to thousands of different devices via hundreds of different wireless service providers, thereby enhancing the productivity of your field/mobile workforce.
- High-speed messaging for emergency/life threatening situations and coordinating joint response efforts.
- Improve the safety of your officers and the public by generating automatic alerts and calls for backup.
- By unifying all wireless communication into a single system, you can give immediate and simultaneous contact among supervisors, squads and mobile units, regardless of agency or jurisdiction.
- Support for multiple messaging applications like group paging, pre-programmed messages, on-call groups, scheduled messages and repeating messages which can be sent directly to the appropriate responding agency or workgroup, simplifying and reducing the cost of communications.
- Streamline and accelerate your operations by sending messages with more information to numerous agencies and departments.
